TL;DR **Your rundown on fintech** in Q3'25

\$10.9B

Fintech funding is flat, but capital is concentrating in mega-rounds.

Fintech funding was flat vs. Q2'25. Deal count declined 9%, reflecting the slowdown in dealmaking across venture. But mega-rounds accounted for 40% of all funding as investors continue to shift toward fewer, larger bets: year-to-date, average and median deal sizes are more than 35% above 2024 levels, even as deal count declines.

[See the data →](#)

23%

AI-enabled fintechs capture their highest funding share in nearly 2 years.

Autonomous solutions have a growing role in fintech and are creating a new competitive tier.

Five of the top 10 deals went to AI-powered finance platforms like Ramp and AppZen, positioning AI leaders to widen their competitive gap as AI-first and agentic solutions scale.

[See the data →](#)

22%

Mid- and late-stage fintech deals hit highest quarterly share since 2022.

Median deal sizes YTD for mid- and late-stage deals have also increased vs. 2024, by 16% and 50%, respectively.

In contrast, early-stage deals now make up less than two-thirds (66%) of total activity, the first dip below 70% since 2020. The shift reflects a strategic pivot toward companies with established business models and clearer paths to scale.

[See the data →](#)

249

M&A deals hit their highest point in more than 3 years.

The recovery in fintech exit activity continues. IPOs for the quarter also hit a 16-quarter high, at 15.

Digital assets remain a key driver: many of the largest M&A and public offerings were in crypto, underscoring growing institutional interest.

[See the data →](#)

\$4.2B

Wealth tech funding YTD, putting it on pace to nearly double 2024 totals.

Wealth tech maintained its momentum in Q3'25 despite a decline in quarterly funding. Companies in the sector are also expanding rapidly: according to CB Insights talent signals, 3 of the top 5 fastest-growing tech markets in year-over-year hiring are in wealth tech, signaling strong confidence in digital-first wealth management solutions.

Report Methodology

You can download the underlying data found in this report here: https://cbinsights.com/reports/CB-Insights_Fintech-Report-Q3-2025.xlsx

If you have questions about the definitions or methodological principles used, or if you feel that your firm has been underrepresented, please reach out to info@cbinsights.com.

What is included:

Equity financings into private companies only. Funding rounds raised by public companies of any kind on any exchange (including Pink Sheets) are excluded from our numbers, even if they received investment from a venture firm.

Only includes the investment made in the quarter for tranching investments. If a company does a second closing of its Series B round for \$5M and previously had closed \$2M in a prior quarter, only the \$5M is reflected.

Round numbers reflect what has closed, not what is intended. If a company indicates the closing of \$5M out of a desired raise of \$15M, our numbers reflect only the amount which has closed.

Only verifiable fundings are included. Fundings are verified via (1) various federal and state regulatory filings; (2) direct confirmation with firm or investor; (3) press release; or (4) credible media sources.

Equity fundings to joint ventures and spinoffs/spinouts are included.

Unicorn data includes private companies valued at \$1B or more in the private markets globally, per the same 4 sources listed above and relied on for funding events, which include valuations disclosed in credible media sources. The list is maintained publicly and updated in real time at <https://www.cbinsights.com/research-unicorn-companies>.

Geography notes: Israel funding figures are classified in Europe; funding to Oceania and Africa is included in global figures but not spotlighted in this report.

Rounds to private companies that may be majority- or minority-owned subsidiaries of other private companies.

Valuation data includes estimates to calibrate median and average valuations based on current and previous quarter disclosed valuations gathered from the aforementioned four sources. The estimating method will control for the over-sampling of large rounds that are reported quickly versus a comparative lag in valuations obtained from other sources. Valuation data reflects post-money valuations.

Exits include IPOs, SPACs, publicly announced M&A deals, and other liquidity events; only first exits are counted.

Headquarters are determined by publicly available sources including company-owned websites and profiles, legal filings, and press releases.

All figures in the report are in USD.

US financing trends follow the combined statistical area (CSA) methodology. Silicon Valley refers to the San Jose-San Francisco-Oakland CSA.

What is excluded:

No contingent funding. If a company receives a commitment for \$20M subject to hitting certain milestones but first gets \$8M, only the \$8M is included in our data.

No business development/R&D arrangements, whether transferable into equity now, later, or never. If a company signs a \$300M R&D partnership with a larger corporation, this is not equity financing nor is it from venture capital firms. As a result, it is not included.

No buyouts, consolidations, or recapitalizations. All three of these transaction types are commonly employed by private

equity firms and are tracked by CB Insights. However, they are excluded for the purposes of this report.

No private placements. These investments, also known as PIPEs (Private Investment in Public Equities), are not included even if made by a venture capital firm.

No debt/loans of any kind (except convertible notes). Venture debt or any kind of debt/loan issued to emerging, startup companies, even if included as an additional part of an equity financing, is not included. If a company receives \$3M with \$2M from venture investors and \$1M in debt, only the \$2M is included in these statistics.

No non-equity government funding. Grants or loans by the federal government, state agencies, or public-private partnerships to emerging, startup companies are not included.

No fundings to subsidiaries of a larger parent corporation unless that subsidiary is a private entity and meets other criteria for inclusion.

Accelerators, incubators, business-plan competitions, economic-development entities are excluded from rankings of most active investors, even if making equity financings.

Rankings for top investors are calculated according to “company count,” or the number of unique companies an investor funds in a quarter, and so excludes follow-on deals.
